Vitasoy USA Donates 1,500 Cases of VITASOY Soymilk to Haiti's Disaster Victims

(Hong Kong – February 12, 2010) The catastrophic magnitude 7.0 Mw Haiti earthquake has caused thousands of deaths and injured. It also left millions of Haiti people homeless, who have an acute need of food and water. Vitasoy is committed to the development of community, and has expressed its heartfelt concern to the sufferings of victims in this plight. Vitasoy USA has donated 1,500 cases of VITASOY soymilk in early February to the victims in Haiti through Feed the Children, a non-profit organization in the United States.

In the last few decades, soybeans have been recognized by scientists as the source of rich protein containing low saturated fat and other kinds of nutrients. Vitasoy hoped to provide the victims with sufficient nutrients through the donation of VITASOY soymilk and ease their hardship temporarily.
