## Vitasoy Releases Sustainability Report 2024/25

(HKSAR, China, 17 July 2025) Vitasoy International Holdings Limited ("Vitasoy" or the "Group", Stock Code: 00345) released its Sustainability Report 2024/25 today, which outlines the Group's progress in advancing its purpose and sustainability targets in the past year.

**Mr. Roberto Guidetti, Group Chief Executive Officer of Vitasoy**, said, "In the past year, we continued to bring the Group's purpose to life by embedding sustainability and our plant-based commitment at the core of how Vitasoy seeks to compete, engage, and serve as a business. We are on track to meet most goals for 2025/26. Looking ahead, we are pleased to announce a new set of Sustainability Framework goals for 2030/31, which demonstrate our renewed focus on progressing the Group's most material ESG opportunities."

Retaining most of the existing targets for Portfolio, Packaging, Manufacturing and Workplace, the Group has upgraded goals for reducing sugar content, energy intensity, and water intensity. In which by 2030, 80% of Vitasoy's product portfolio will consist of low sugar or no added sugar options, defined as containing less than 5g of sugar per 100ml or 100g of products, instead of the previous target of moderate to zero sugar beverages. This enhanced target reflects Vitasoy's commitment to significantly reducing sugar content across the product range, aligning with evolving health trends, regulatory expectations, and consumer demand. Vitasoy will also endeavour to reduce energy and water used to manufacture each unit of product by 10% by 2030/31. These goals underscore the Group's dedication to sustainable development which are in line with its business growth objectives.

The Group cooperated with its key value chain partners so that the exacting standards for quality, taste, nutrition, hygiene, environment and ethical business practices were adhered to. In the past year, the Group examined nature-related risk for soy in its supply chain. Vitasoy systematically analysed impacts and dependencies of major soy farms in China and Australia. Under Vitasoy's Sustainable Farming Guidelines, the Group is working closely with contract farmers on integrated land, water, pest control and fertiliser management plans that aim to achieve higher yields with lower environmental impact.

The Group is committed to decarbonisation and climate resilience. While the majority of environmental impacts from operations occur outside of the Group's direct control, Vitasoy has updated its carbon inventory in alignment with the latest international standards for calculating Scope 3 emissions from raw materials used in products.

On climate and nature disclosure, Vitasoy continued to release a standalone report following recommendations set by the Task Force on Climate-related Financial Disclosures (TCFD) and the Taskforce on Nature-related Financial Disclosures (TNFD). The report consolidated disclosures about the Group's impacts, risks and opportunities, and dependencies relating to climate change, nature and biodiversity.

Vitasoy promotes awareness for healthy lifestyles through community engagement efforts, including the Vitasoy Community Care Programme, a multi-year school nutrition and education programme in Mainland China. In 2024/25, the programme provided around 7,000 students across 49 schools in 11 rural counties of Mainland China with nutritional education, sports activities, and over 1.97 million packs of Vitasoy Low Sugar Soyabean Milk. Vitasoy Australia has also continued to support Mulloon Institute in its research, advocacy and education efforts in farmland restoration. In the past year, Vitasoy Australia's "Buy a Litre, Restore a Metre" programme channelled profits from the sale of its plant-based milk products in participating stores directly towards helping Australian farmers to achieve Mulloon Institute's goal of restoring 2.5 million hectares of farmland.

Vitasoy will keep progressing towards its 2025/26 sustainability targets and proactively prepare to meet its 2030/31 goals in the seven areas outlined in its Sustainability Framework: Portfolio, Packaging, Climate, Manufacturing, Suppliers, Workplace and Community.

More details can be found in Vitasoy's latest Sustainability Report [here](#).
